

API Response Demo (PDF)

This document simulates a response returned from an API endpoint that delivers a PDF file.

Endpoint:

```
GET /api/reports/123
```

Response Headers:

```
HTTP/1.1 200 OK
Content-Type: application/pdf
Content-Disposition: attachment; filename="report_123.pdf"
Cache-Control: no-cache
```

Response Body:

Binary PDF content is returned here. The client (browser or app) interprets it and renders or downloads the file.

Alternative (Base64 JSON Response):

```
{
  "fileName": "report_123.pdf",
  "fileType": "application/pdf",
  "data": "<base64-encoded-content>"
}
```
